2 CONTACT THE TOTALCARE CENTER NEAR YOU.

Select the TotalCare Center that's located closest to you and contact the Center directly to get your TotalCare order started.

NOTE: You'll find TotalCare Center contact information on the back page.

PPE Cleaning On A Whole New Level

REDZONESM CO₂ CLEAN

powered by

LION REDZONE CO2 CLEAN PROVIDES THE MOST EFFECTIVE PPE CLEANING ON THE MARKET.

Conventional firefighting gear cleaning methods provide limited decontamination results and can take days to complete. But, RedZone CO2 Clean decontaminates PPE quickly in approximately 60 minutes.

While Ozone cleaning is effective at removing biological contaminants like bacteria and viruses, RedZone CO2 Clean also targets **poly-aromatic hydrocarbons (PAHs)** and **volatile organic compounds (VOCs)**. RedZone CO2 Clean eliminates over 95% of these "bad actors."

RedZone CO2 Clean is available exclusively from **LION TotalCare®** and can be used on **ALL models and brands of gear** – including helmets, hoods, turnouts, gloves and boots. ▶▶

THE TERSUS CLEANTECH

HIGH-PERFORMANCE PPE BIOHAZARD DISINFECTION:

Ozone Gear Cleaning

TotalCare uses Ozone in every extractor cleaning cycle to treat gear for biohazards encountered on the job – an extra safety measure that is not typically provided by other ISPs.

Ozone is not only an **extremely effective gear cleaning agent**, but it's also **non-toxic and chemical-free**.

HOW OZONE CLEANING BENEFITS YOUR GEAR
Ozone provides 99.999% disinfection from **germs, viruses and bacteria**.

Due to its powerful oxidation properties, Ozone dissolves gear soils on contact. And it does this at ambient water temperatures, instead of conventional 140° to 160°F.

Washing gear at this lower temperature reduces the washing and drying cycles, providing thorough cleaning, while reducing turnout wear and tear.

Ozone also attacks most organic soils and kills bacteria 3,200 times faster than chlorine bleach, while being **completely biodegradable**.

QUICK FACT:

Smoke deposits and residue can be trapped in gear and remain there until cleaned, exposing firefighters to secondary cancer-causing toxins.
