TotalCare®

The Cleanest Gear. Period.

We offer the most advanced technology on the market to keep your gear cleaner and safer than it's ever been.

Supercritical CO_2 technology has been used on **more than 1 million pieces** of PPE worldwide.

The Most Advanced Gear Cleaning Available

Conventional cleaning methods can't match the award-winning supercritical CO_2 technology by Decontex. It exceeds all NFPA 1850 standards and is guaranteed to provide:

100%
removal of VOCs and PAHs from all layers of PPE

100%
removal of stains and odors from protective gear

>99%
removal of heavy metals from outer shell materials

THE PROCESS

45 minutes from start to finish
With no drying time, the entire process takes less than an hour.

No damage after 100 cycles
Minimal agitation and low temperatures help preserve your PPE.

THE IMPACT

No water or harmful chemicals
Clean your gear without damaging the environment.

Safe and secure disposal
All contaminants are collected and properly disposed.

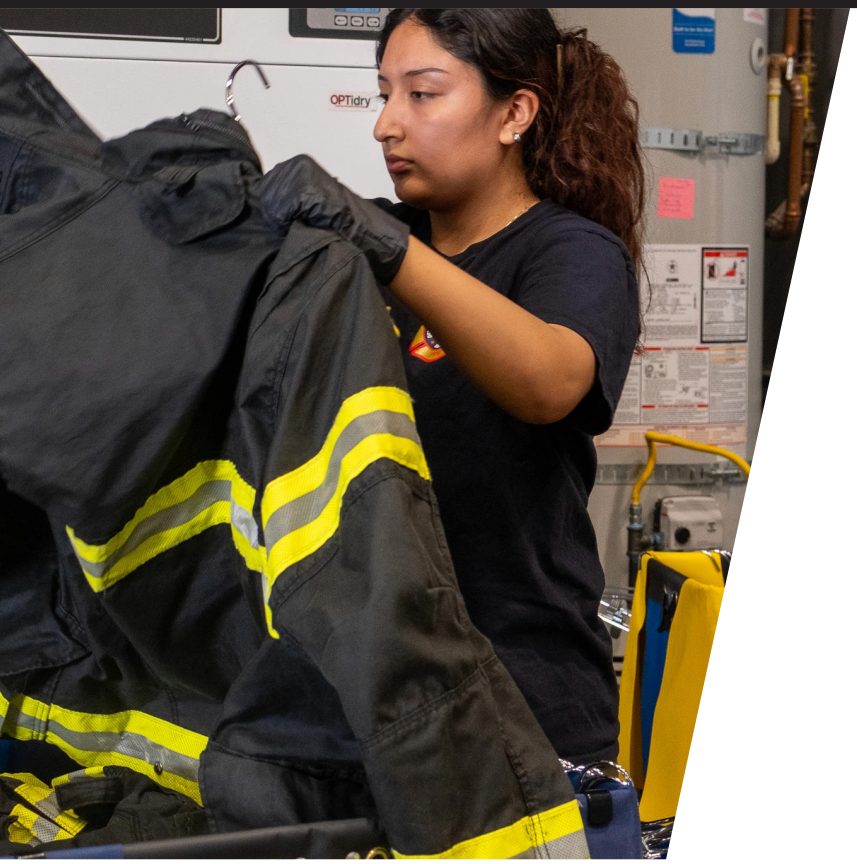

100% eco-friendly process
Green technology is built into every aspect of the system.

ABOUT THE TECHNOLOGY

DECONTEX
CLEANER. SAFER. HEALTHIER.

- Invented by NASA and perfected by Decontex, the cleaning process fully penetrates PPE layers to remove contaminants.
- Supercritical CO_2 machines are scientifically proven to be more effective than liquid CO_2 machines.
