ready for action

INTRODUCING

V-Force[®]

High-Performance Custom Bunker Gear

FEATURES & BENEFITS

- ▶ **CUT-IN-MOTION DESIGN:** Contoured coat sides evenly distribute the weight of your coat and position seams to reduce conflicts with SCBA straps that can cause irritation and discomfort.
- ▶ **VIZ-A-V[™] TRIM PATTERN:** LION's trademark Ventilated Trim[™] pattern provides high visibility while allowing vapor to escape – which guards against potential compression burns.
- ▶ **BI-SWING BACK:** This coat style features inverted pleats in both the outer shell and liner system that expand as your arms move forward. The result is no tugging, binding, or bunching of material.
- ▶ **COMFORT COLLAR:** Ergonomically shaped to improve comfort, interface well with other PPE elements, and deliver continuous thermal and moisture protection.
- ▶ **RAGLAN SLEEVES:** Shaped like your arm to promote free, unrestricted movement and reduce bunker coat hem rise.
- ▶ **RADIAL INSEAM:** A banded insert runs continuously from the top of the knee of one leg, through the crotch, and to the top of the opposite knee. This not only reduces tension and increases comfort, but extends the life of your bunker pants.
- ▶ **V-FIT[™] KNEES:** Contoured knees use cutouts, shaped pieces, and darts to enable free and easy movement. Distinctive V-Notch[™] polymer-coated aramid reinforcements protect against high-abrasion wear and help keep heat and moisture out.
- ▶ **V-FIT LEGS:** Contoured pant legs with ergonomic shaping for full mobility when bending, kneeling, or crawling. The SemperDri[™] System in the bottom portion of the legs reduces water absorption to keep gear lighter.

TOP-TIER CANADIAN-MADE FIRE GEAR DESIGNED TO WORK AS HARD AS YOU DO.

- F. Tool Pocket
- G. V-Fit™ Elbows & Knees
- H. Ventilated™ Trim
- I. Gusseted Pants
- J. Zipper Coat closure with hook and loop storm flap

V-Force®

High-Performance Custom Bunker Gear

LION's Starfield V-Force® bunker gear features an innovative cut-in-motion design for a more ergonomic garment that moves the way you do, while still offering unparalleled protection. Professional sports and military technology combine to create bunker gear that provides the mobility and comfort to do your job every day, with the toughness and durability you expect from LION Starfield. V-Force comes standard with LION's patented IsoDri® Moisture Management System. IsoDri bunker gear absorb less water, helping protect against compression burns, while keeping gear drier and lighter during use and between runs. In wet conditions, IsoDri gear remains more breathable and comfortable, reducing fatigue and heat stress.
