

ATTACK™

DIGITAL FIRE TRAINING SYSTEM

Intensify Your Training

Bring realistic fire training anywhere—even where live fire isn't an option.

ATTACK™ uses advanced LED panels to create digital flames that respond to a water hose or laser nozzle. Firefighters need to use proper techniques to put out the flames. If not, the fire continues to grow. Add safe smoke and realistic sounds, and you have an immersive experience that will test firefighters of all skill levels.

Train More Often

Set up quickly, run repeatable evolutions and maximize training time without the logistics of live-fire burns.

Build Essential Skills

Work on hose line advancement and nozzle control—crucial skills your team will need during a real fire.

Vary the Situation

Move the ATTACK panels to different locations throughout the day to keep your training scenarios fresh.

Update Existing Facilities

Transform older burn buildings and fire towers into new training environments, without costly renovations.

“LION collaborates with us to help design our training, which helps us keep our community safe.”

Michael C. Mire

Assistant Fire Chief,
Houston Fire Department

ATTACK™

Digital Fire Training System

Taking It to the Next Level

ATTACK works with other LION products to help you ramp up the realism.

RELATED PRODUCTS

HyperFire™

Wirelessly link up to nine ATTACK panels to simulate larger fires. It's high-tech, high-intensity training that gets the job done.

SG4000™ Smoke Generator

Our plug-in generator adds dense, safe smoke to your sessions to create an even more realistic experience.

Digital Nozzle & Weighted Hose Line

No water? No problem. Use our digital nozzle and 50 ft. weighted hose to simulate a fully charged line.
