

Hyperfire[™]

Elevate Your Digital Training

Wirelessly connect up to nine ATTACK panels to make your digital training more intense and effective. You can build custom configurations to simulate rollovers and show how fires grow and expand—without the risks of traditional live-fire exercises.

HyperFire[™] will challenge even the most experienced members of your team, making it the perfect digital training system.

Create Bigger Scenarios

Build large, complex incidents that require coordinated responses from everyone on the scene.

Vary Training Sessions

Arrange the panels in different configurations and locations to keep your training fresh and new.

Train More Efficiently

Start, stop and rerun scenarios without having to put out a fire or clear the room of harmful smoke.

Maximize Your Time

Set up the entire system in minutes, and use the intuitive software to modify sessions instantly.

“LION collaborates with us to help design our training, which helps us keep our community safe.”

Michael C. Mire

Assistant Fire Chief,
Houston Fire Department

Taking It to the Next Level

With the core system in place, you can customize HyperFire to meet your needs.

RELATED PRODUCTS

SG4000™ Smoke Generator

Add dense, safe smoke to reduce visibility and increase realism during firefighting drills and search operations.

Industrial Remote

Our waterproof remote lets instructors stay in the middle of the action without worrying about damaging anything.

Tablet Controller

You need a tablet controller for setup and configuration, and you can supply your own or purchase one through LION.
