SmartDummy™ Rescue Manikins

The Smarter Way to Train

The SmartDummy™ is tough enough to meet the demands of training and smart enough to interact with rescuers—making it perfect for search and rescue drills.

Our rescue dummies have flexible joints and are evenly weighted to make them feel like a real victim. They also come with a built-in VoiceBox that can call out for help to add another level of realism to your training.

Create More Realistic Rescues

Practice authentic carries and drags with two different weight options: 55 pounds and 110 pounds.

Prepare for a Range of Events

Choose rescue, extrication or thermal models to match the environment, hazard and training objective.

Protect Your Team

You don't need a firefighter to play the role of victim, which helps reduce injuries while being rescued.

Train Longer, Harder

All dummies are made of heavy-duty canvas and crush-resistant materials to allow for years of use.

"LION collaborates with us to help design our training, which helps us keep our community safe."

Michael C. Mire
Assistant Fire Chief,
Houston Fire Department

SmartDummy™ Rescue Manikins

Taking It to the Next Level

In addition to the base rescue dummy, we offer two special models and accessories to customize your training.

PRODUCT MODEL

Rescue

Our versatile base model, available in a range of builds up to 110 lbs. and 5'10", for realistic victim carries and drags.

Extrication

Built for vehicle extrication and entrapment scenarios, with simulated severe victim injuries.

Thermal

Generates realistic, detectable body heat for training with a thermal imaging camera (TIC).
