

# Intelligent Training System™ (I.T.S.)

## Work on Live Fires Without the Mess

The Intelligent Training System uses propane flames and extinguishers filled with water and compressed air—not messy dry chemicals—to provide realistic live-fire training for regular citizens.

Users can safely practice on Class A, B and C scenarios while trainers avoid the mess, fumes and cleanup associated with traditional chemical extinguishers and burn pans.

### Train in Minutes

The compact design and push-button controls let one person quickly set up and run evolutions.

### Experience Real Flames

Users work on real flames and feel real heat while learning proper techniques in a safe environment.

### Reduce Cleanup Time

Air-water extinguishers eliminate dry chemical residue so training can continue with less mess.

### Save Money

Low operating costs allow you to train as many people as needed—as often as you like.

*“LION collaborates with us to help design our training, which helps us keep our community safe.”*

**Michael C. Mire**

Assistant Fire Chief,  
Houston Fire Department

## Intelligent Training System™ (I.T.S.)

### Taking It to the Next Level

With the core platform in place, you can customize the I.T.S. to meet your needs.

#### RELATED PRODUCTS

##### Class A, B and C Props

Add heavy-duty props like a trash can, stove top, electric motor and paint locker to mimic real scenarios.

##### Extra Extinguishers

Keep your sessions moving by adding extra rechargeable SmartExtinguishers™, available in two sizes.

##### Regulator/Compressor

Recharge the extinguishers from an SCBA tank with our regulator assembly kit. Or use our 6-gallon air compressor.
